Electric Guitar

Compared with traditional guitars, electric guitar has distinctive differences on appearance and sound. Guitar body is made by new hardwood, accompanied with volume and tone adjustor and tremolo structure and other devices. When used along with other effect pedals, electric guitar has strong expressive force. As getting rid of limit of resonance chamber, it enlarges range of common guitars, and strengthens expressive force of high position. Additionally, since volume of electric guitar can be both loud and low, note value can be long and short, so compared with common acoustic guitars, there is a larger leeway on performance, and more savvy on expressing glissandi, roulade and appoggiatura. More, tamper of electric guitar can be changed, modified by various effect pedals to achieve different effects and play musical compositions of different styles, it is the attractive point of this musical instrument.

Electric Basses

Electric bass belongs to electric musical instrument, whose volume variation can be regulated. Sound in middle& low pitch area is thick and loud, whole sound in high pitch area is comparatively clear. User can play characteristic melody by various techniques by electric bass, hence electric bass does not only appear as accompanying musical instrument of low pitch, it often sounds impressive musical sentence with elegant timbre and smooth melody. Electric bass is nearly just used in modern electric band as low pitch voice part of the whole band. It often uses Alberti Bass, in roulade of music, electric bass often plays transitional melody which may largely enrich tamper of the band.

China Joy Guitar Co., Ltd

China Joy Guitar Co., Ltd

Fender, Peavey, Aldi, Casino and Eldorado source our guitars

Handmade and spray-painted 10 times for a long-lasting finish

The attention and care we put into each guitar we manufacture is something that our competitors can't match. And it's also why our products are being sourced by Eldorado, Fender, Sonae, Peavey, Casino, Epiphone, Cora, Aldi and Argos and other well-known buyers. Our three spray-painting workshops for electric guitars and another three for wooden models are proof of our commitment to providing products that last. To ensure colors that won't fade over time, we painstakingly spray-paint each unit at least 10 times.

We further ensure the reliability of our guitars by conducting function tests, making sure the strings do not touch the frets to avoid distortion. All of our guitars come with CE, FSC, UL and RoHS marks for easier distribution in your region.

Choose from over 300 electric, acoustic and bass guitars, as well as more than 200 classical models. For precise rendition of your design, we take a picture of the mold and compare the product against it to make certain every detail is being followed. With two factories, we are ready for your volume orders. Inquire today.
